Thanks Larry – Is it possible to also get a copy of the results of any tissue analyses from samples in the Ship Channel?

Regards,

David

Subject: Fish tissue result from Patrick Bayou

A few weeks ago, you asked for results from a recent (August 2009) TMDL fish sample from Patrick Bayou that was analyzed for PCBs. Now that University of Houston has completed QC on the results, they provided the attached data.

Total PCB values for three stations are included, with sediment as well as fish.
